

## **CLARIFICATION**

**Islamabad 07 May, 2011:-** Some of the leading national newspapers have published an ambiguous statement on 07 May, 2011, causing unwarranted confusion pertaining to PAF's air defence system on the night of 02 May, 2011. This is to clarify that impression given by such news about PAF's radars being inactive or inoperative on the night of 02 May 2011 is misleading. The factual position is that all the radars of Pakistan Air Force were active on the night of 02 May 2011, as per the peace time deployment policy of PAF.
