**Inauguration of Pakistan Air Force rehabilitation plan for flood affectees. (05-12-2010)**

## **PAF TO PROVIDE FREE OF COST HOUSES TO FLOOD AFFECTEES**

**ISLAMABAD 05 DECEMBER, 2010:-** PAF has launched a rehabilitation plan for the flood affectees in simultaneous ceremonies held in all the provinces under Regional Air Commands.

PAF rehabilitation plan aims at providing free of cost construction of houses for flood affectees in flood hit areas of Pakistan which faced maximum devastation during the recent floods; these include areas in and around Mianwali, Daood Khel, Jacobabad, Dera Allahyar, Charsadda and Risalpur. PAF plans to construct over six hundred houses and the project would be completed within four months.

The sites for the construction of the houses have been selected in consultation with the local civil administration and due attention has been paid for verification of ownership and damage assessment prior to undertaking the construction process. The rehabilitation plan is being centrally controlled at Air Headquarters, Islamabad under the supervision of Regional Air Commands which will monitor the construction process and ensure timely handing over of the houses to the flood affectees.

The launching ceremony today marks the commencement of third phase of a comprehensive PAF plan to assist the flood affectees. Earlier in Phase-I, PAF rescued the stranded flood affectees and provided them with relief goods; Subsequently in phase II relocated the affectees to flood relief camps established by PAF at Sukkur, Bakhtiarabad, Mianwali, Pir Pathu, Jacobabad and PAF Academy Risalpur. The plan is being launched under the directive of the Chief of the Air Staff who considers this as a small contribution of the PAF for our brothers & sisters who have been affected by the natural disaster.
